MINIMUM WAGE ASEAN

Minimum Wage Increases Across ASEAN

What is Minimum Wage

Minimum wage is also defined as the lowest remuneration that employers can legally pay their workers – this is also the “price floor” below which workers may not sell their labour.

By the end of the 20th century, most countries including ASEAN nations introduced minimum wage legislation.

MINIMUM WAGES IN ASEAN

To match the rising cost of living across ASEAN nations, minimum wages have been steadily increasing. Many ASEAN countries have been pushing for higher minimum wage levels and enacting new labour laws to protect their workers’ rights.

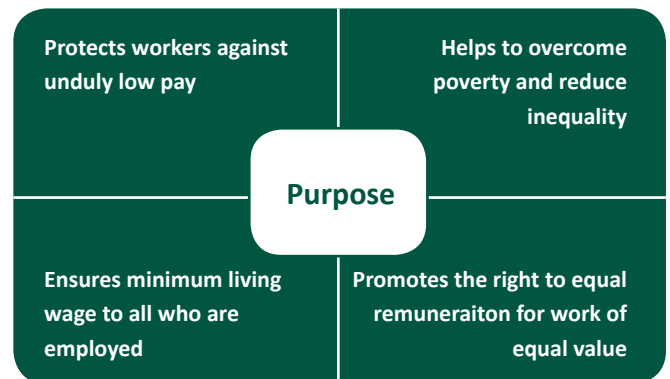

Effective 2020, ASEAN countries that have recently implemented minimum wage increases :

- Indonesia

However, despite rising salaries, minimum wages across ASEAN continue to be lower than most developed nations and are often considered the lowest in Asia.

CONCLUSION

(a) Impact on the Business

(b) What Should Employers Do Now?

- In countries where the geographical locations have been segmented into different zones (eg: Malaysia, Indonesia, Thailand, Vietnam), employers should check which zone / region they belong to, in order to establish the applicable rates.
- Ensure you prepare your budgets, new costs, and the capacity of your operation that takes such costs and factors into consideration
- In some industries, eg: Hospitality, Retail or F&B where businesses are heavily reliant on labour, employers may also need to start offering additional benefits to attract and retain employees. These include flexible or more predictable work schedules, time off and other benefits.
